Program Credit Transfer Points	
•	100% of students in the step- up track in Emergency Management and Homeland Security received transfer credit averaging 60-66 credits. Any response related accredited program is accepted under the transfer model into EMHS.
•	Students under the new (as of Fall 2016) traditional path in Emergency Management and Homeland security can transfer up to 15 credits into the program from completing The University of Akron Police Academy. Through the program relationship, students can receive financial aid for the Police Academy while accumulating EMHS academic credit.
•	Up to 15 credits of training through the University of Akron's Training Center for Fire and Hazardous Materials can be used in the traditional EMHS program pathway.

Emergency Management and Homeland Security Program : Conservative Placement Rate: Defined as “% of respondents who earned an undergraduate degree and are employed full time in their chosen field, or in a position that requires a degree, or they are continuing their education”.	
Spring 2014 (within two years of graduation)	
# Graduates surveyed	11
# respondents	11
% conservatively placed	91%
# participated in experiential learning (at least one experience)	10 (11*)
Spring 2015 (within one year of graduation)	
# Graduates surveyed	20
# respondents	19
% conservatively placed	58%
# participated in experiential learning	18 (20*)

* Note: All students must complete a required internship to graduate. Therefore the number of graduates and those that participated in experiential learning is equal. The term “experiential” learning may have confused respondents as it is listed as an “internship”.
