

Who We Are

Ridge Tool Company (brand name RIDGID®) is the world's leading manufacturer of professional quality pipe and tube working tools serving the plumbing, mechanical, construction, HVAC and facility maintenance industries. The RIDGID trademark is recognized by professional tradesmen and engineers for uncompromising product quality, performance, durability and service.

What We Are Seeking

Ridge Tool is currently seeking to fill an opening for a position for a **co-op** in the field of **mechanical engineering** in product design. This position provides the opportunity to be part of the team developing and manufacturing the world's premier brand of professional grade plumbing and pipe working tools!

Mechanical Engineering Co-Op – Employees will gain experience in engineering lab testing, computer aided design, engineering analysis, manufacturing processes and product design. The position will also provide an opportunity to apply engineering theory toward solving real world challenges.

Our Location

Ridge Tool is a global company with its corporate headquarters in Elyria, Ohio, USA (30 miles west of Cleveland). This 650,000 square foot building houses global offices, engineering/innovation center, training center, factory service and manufacturing. Ridge Tool is a subsidiary of Emerson, a fortune 500 Company dedicated to improving the quality of people's lives around the world. Ridge Tool is approximately one hour away from The University of Akron via the Turnpike (I-80) and about 30 minutes west of downtown Cleveland.
