School of Allied Health Technology Professor Leads Continuing Education Program

William C. Fiala, professor of practice in the School of Allied Health Technology, conducted a continuing education program on Oct. 5 in Cincinnati for the Great Lakes Conference of American Medical Technologists (AMT), a certification agency in existence since 1939 credentialing medical technologists, medical laboratory assistants, and medical assistants.

The program included a discussion of new classifications for a range of morbid conditions, including elevated Lipoprotein(a), a genetic lipid disorder and risk factor in younger patients for cardiovascular disease, including heart attack, stroke and peripheral arterial disease as well as calcific aortic valve stenosis.

Participants in the program were awarded continuing education credits by AMT.
